Road Safety Dominoes Game Instructions

We recommend that the ***Kids and Traffic Road Safety Dominoes*** game be played with children aged 3-5 years. We also recommend that only 2-4 children play the game at a time, together with an educator. This small number of children allows for lots of discussion around road safety whilst you're playing the game. This game is best played on the floor.

To make this game a reusable resource, we suggest you laminate the domino cards and put them in a bag.

Kids and Traffic Key Road Safety Messages to discuss with children when playing the game, include:

- Always hold a grown-up's hand
- Always cross the road with a grown-up
- Always buckle up your seatbelt in the car
- Always use the 'Safety Door' (usually the rear left hand side of the vehicle)
- Always wear your helmet when riding your bike or wheeled toy

Before starting the game, shuffle the dominoes. Then, holding the pack of *Kids and Traffic Road Safety Domino* cards face down, evenly distribute the cards amongst the players. There will need to be at least one 'starting domino' placed on the floor also. There are 34 domino cards in total. So, for example, if there are three players – each player will receive 11 domino cards and the remaining card will be the 'starting domino'.

Each player then takes a turn and tries to match the number or the road safety picture on one end of a domino, with a number or picture on an open end of any domino (see pictured example on right).

Players may use the blank dominoes to represent any number or road safety picture and make a match! Players who cannot make a match must then wait for another turn.

The game is completed once all players have used their domino cards or when no more players are able to make a match.
